EDUCATION

University of Michigan

Masters of Applied Data Science

Ann Arbor, MI

Sep. 2021 – May 2024

University of Texas

Bachelor of Science in Biochemistry, Minors in Business, Computer Science, and IT

Austin, TX

Aug. 2011 – May 2015

CERTIFICATIONS

AWS Certified: Database, Data Analytics, Machine Learning Speciality, and Solutions Architect Associate

Microsoft Certified: Azure Data Engineer and Azure Data Scientist Associate

Certified Associate in Project Management (CAPM)

EXPERIENCE

Data Quality Manager

Capgemini

Aug. 2018 – Present

Houston, TX

- Lead four parallel workstreams beyond the original data-quality remit – data engineering, ServiceNow administration/ITOM, customer rebid, and financial-systems modernization – managing a direct report and a subcontractor.
- Serve as data engineer on a Databricks lakehouse modernization (AI-assisted via Claude Code): designed and shipped 7 end-to-end Delta Live Tables pipelines (bronze/silver/gold medallion, several with an Apptio-billing platinum layer) with orchestration jobs on Databricks Asset Bundles and Unity Catalog, migrating a legacy on-prem ITFM database.
- Engineer a governed medallion architecture of 29 Unity Catalog tables (10M+ rows), authoring Auto Loader streaming ingestion from external Volumes and ServiceNow-sourced feeds via Lakeflow Connect/REST, and integrating 100+ connectors between Databricks and Apptio ITFM.
- Built a ServiceNow data-quality application running 100+ automated checks that drive enterprise data-quality SLA reporting, with dashboards and automated ticket notification.
- As ServiceNow administrator, established the Identification and Reconciliation Engine (IRE), expanding CI reconciliation ~1,000x – from ~10K CIs to a 10M+-record CMDB with 10M+ quarterly updates from daily Discovery scans – and defined a CI retirement/archival strategy via ServiceNow Data Manager.
- Led an ETL workstream saving \$2M annually by automating data processes across hundreds of thousands of records and millions of monthly updates – owning requirements, testing, and stakeholder approvals.

IT Financial Business Analyst

Capgemini

Aug. 2016 – Sep. 2018

Austin, TX

- Administered an enterprise financial system, generating millions in monthly invoices for Texas Public Agencies, ensuring accuracy and timely processing.
- Led several data analytics and automation project initiatives that included developing automated billing methodology, creating a financial forecast (\$12 Billion forecasted over 4 years), and automating manual tasks.

PROJECTS

Apple cultivars and climate change in the US | *geopandas, xarray, sklearn*

May 2024

- Extracted data via web scraping and built a wrapper for the OikoLab Weather data API.
- Built regression models forecasting US temperatures and assigned USDA hardiness zones for long-term orchard planning.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL (Postgres, MySQL), HTML/CSS, R

Technology: Databricks (Delta Live Tables, Unity Catalog, Asset Bundles, Auto Loader), Delta Lake, medallion architecture, ServiceNow (Discovery, ITOM, CMDB), Apptio, Lakeflow Connect, Azure (Synapse, Data Factory, ML), AWS (SageMaker, Glue, Athena, Kinesis), Power BI, Tableau, Git, Docker, Claude Code

Libraries: pandas, numpy, scikit-learn, pyspark, mlflow, pytorch, keras, huggingface, matplotlib, seaborn, SciPy, BeautifulSoup, selenium, boto3
